Actisense collaborates with Raymarine®

Actisense, the market leading marine electronics brand from Active Research Limited, based in Poole, UK, have recently teamed up with Marine Electronics giant, Raymarine®, to launch their NGW-1-STNG, a SeaTalkng Gateway.

Speaking from their Poole, Dorset Headquarters, Managing Director of Actisense, Phil Whitehurst, explained the synergy: “We are delighted to partner with Raymarine®, a global leader in marine electronics. Our combined vision for the SeaTalk Gateway (NGW-1-STNG) is to be the number one device for data handling, conversion and reporting for NMEA systems and we have spent a significant amount of time and resource in developing this very user-centric product.”

The Actisense NMEA 2000® to NMEA 0183 Gateway is the easiest way to link between a boat's old and new data networks. The NGW-1 can convert NMEA 0183 data into NMEA 2000® data and vice-versa.

Stuart Heptonstall, a Senior Global Product Manager at Raymarine, said: “This has proven to be a mutually beneficial working relationship. We identified Actisense as an expert in the field of NMEA connectivity. The NGW-1-STNG allows seamless data transfer between external NMEA 0183 devices and SeaTalkng which is exactly what we were looking for and Actisense performed to the brief admirably. We look forward to an ongoing relationship with Actisense.”

The NGW-1-STNG is available for sale via Actisense's worldwide distributors.

Notes to Editor

Actisense, the brand from Active Research, is dedicated to supplying the leisure and commercial marine markets with intelligent sensors and interfaces that are unrivalled for their quality, features and reliability.

The "Actisense" brand name was created in 2001 to help promote the company's growing range of marine interconnection devices and smart sensors.

Based in Poole, Dorset on the south coast of England, Active Research Limited has established an enviable world-wide reputation within the specialist field of marine electronics.

Active Research was started in 1997 by Phil Whitehurst, who as a Chartered Electronics Engineer recognised there was a need within the market place for innovative and reliable marine electronic equipment, both in the UK and worldwide.

Active Research has become a well known high quality brand of marine interfacing equipment.

Active Research is a member of both the BMF and the NMEA.
